# Training Courseware Solutions

Looking for new training materials to enhance your classroom learning?

### Also from ASCENT

In addition to Student Guide, Instructor Tool Kits, and eCourseware, ASCENT offers the following resources to assist you in the classroom:

#### Knowledge Assessment Tools:

Ensure students are learning the way you want them to. All of our assessments are delivered online with detailed results reports available to the instructor for each student.

#### Online Reference Material:

Find answers to your engineering software questions with ProductivityNOW SOLO, our user-friendly knowledgebase.

Obtain tips and techniques, view video demonstrations, practice your skills with hands-on exercises, and review questions answered by our certified Support Engineers.

*ASCENT- Center for Technical Knowledge® is pleased to offer you a library of training materials for **Autodesk, Pro/ENGINEER and CATIA** software.*

## Who is ASCENT?

ASCENT - Center for Technical Knowledge develops and publishes a wide range of courseware and knowledge assessment tools for leading engineering software programs. Our developers combine real-world knowledge through their experience of teaching and using CAD in engineering and architecture to create professional training materials. Our training guides are used in classes throughout the world at colleges, universities, corporations, and Autodesk Training Centers.

## Courseware Titles available for Purchase

### AutoCAD Products:

AutoCAD	Maya
AutoCAD Architecture	Revit Architecture
AutoCAD Electrical	Revit Structure
AutoCAD LT	Vault
Architectural Desktop	VIZ
Civil 3D	3ds Max
Inventor	

### Pro/ENGINEER

**CATIA V5**

**ENOVIA SmarTeam**

Authorized Developer

# Training Courseware Solutions

## Why use ASCENT Training Guides in your classroom?

**Experienced Company:** ASCENT has over 20 years of experience developing high-quality, professional curriculum, technical documentation, and knowledge assessment products for engineering applications.

**Dedicated Authors:** ASCENT staffs a multidisciplinary team of engineers, technical writers, courseware developers, and instructional designers. Our authors are also instructors who can rise to the challenge of creating curriculum that effectively engages students.

**Comprehensive Student Guides:** Each Student Guide includes a CD with drawing files for lab exercises. We value client feedback and update and enhance our courseware based on the comments we receive from our clients.

**Instructor Tool Kits:** Teaching the class? Let us do the prep work for you! Our Instructor Tool Kits give you online access to PDF with answers to questions throughout the course, as well as timing for delivery of various sections of the course, CD with lab exercises, and a copy of the Student Guide.

**eCourseware:** the most effective course content, in a format that suits you! The courses are presented in a topic-by-topic structure and is available through the ProductivityNOW portal. Course features include: modules that can be bookmarked, searchable keywords, a certificate of completion, and three months access to the course - so you can complete it at your convenience!

**Printing Options to suit your needs:** Order our books pre-printed and spiral bound, or print the quantity you need, when you need to, with our electronic license option.\*

**Purchasing Convenience:** Purchasing books is easy through our online eStore, or if you prefer, contact one of our customer service representatives at 1.866.527.2368 or Email: [courseware@ASCENTed.com](mailto:courseware@ASCENTed.com). *Overnight shipping options available.*

***Our goal is to provide you with training materials that present the topics necessary to master the CAD program in a logical and comprehensible way.***
