

## INSTRUCTOR GUIDES OVERVIEW

### Are you an Instructor using Autodesk Software?

If so, ASCENT is pleased to offer Instructor Guides to provide you with all that you need to teach the training course. Instructor Guides contain all the same instructional content as a Learning Guide while also including answers to the chapter review questions, timing suggestions to help you deliver various sections of the course, and instructor presentation files that complement the guide.

The Instructor Guide format is new for ASCENT with the Autodesk 2019 software release. With 2019 releases and on, all information is now included in the Instructor Guide and you are no longer required to purchase a separate copy of the Learning Guide.

Similar to our Learning Guides, Instructor Guides are available for purchase in a print or eBook format.
