### Educational Pricing Available

ASCENT offers educational pricing to schools, universities, and other educational institutions. Please [contact us](#) for further details.

### Why choose ASCENT?

**Experience:** ASCENT has 20+ years of experience developing high-quality professional curriculum and technical documentation for engineering applications.

**Dedicated Staff:** ASCENT staffs a multidisciplinary team of engineers, technical writers, courseware developers, instructional designers and architects. Our authors are also instructors who can rise to the challenge of creating curriculum that effectively engages students.

**Variety of Product Formats:** Student Guides available in a printed format or digital eBook format. Instructor Tools also available to help those teaching the course.

**Purchasing Convenience:** Products are available online through [ASCENT's eStore](#) and through [Amazon.com](#).

### ALSO FROM ASCENT

#### Customization:

ASCENT can tailor any of its standard courseware to address your unique training needs. Whether it's adding or removing copy, inserting client-specific models, or creating completely unique content, we'll work with you to create courseware that best fits the needs of your organization.

#### Technical Editing & Writing:

Let ASCENT do the writing for you. Our Technical Writers will get to know your organization's products and concepts before effectively communicating that information into a format of your choice. Our writers also offer basic editing and proofreading services to clean up grammar and punctuation in existing documents.

#### PLM Documentation Services

If you've invested in a PLM system, be sure you're getting the most out of that investment by thoroughly documenting your organization's PLM processes. Using their skills from developing instructional training materials, the ASCENT team can create well-written, client-specific PLM documentation that can be used as a reference tool for your organization and employees.
