# Chapter 2: Space Planning & Area Analysis

## 2.1 Space Planning
- Modifying Rooms ................................................................. 2-5
- Adding Room Tags ..................................................................... 2-6
- Room Schedules ........................................................................ 2-7
- Room Settings ........................................................................... 2-8

**Practice 2a Space Planning** ...................................................... 2-9

## 2.2 Area Analysis
- Creating Area Plans ................................................................. 2-13
- Placing Area Boundaries ......................................................... 2-15
- Adding Areas ............................................................................. 2-16

**Practice 2b Area Analysis** ......................................................... 2-19

## 2.3 Creating Color Schemes
**Practice 2c Create Color Schemes** ............................................. 2-29

## Chapter Review Questions ......................................................... 2-35

## Command Summary ................................................................. 2-37

# Chapter 3: Visualization

## 3.1 Creating Perspective Views
- Modifying Perspectives .......................................................... 3-4

**Practice 3a Create Perspective Views** ....................................... 3-7

## 3.2 Working with Graphic Display Options
- Model Display ............................................................................ 3-10
- Shadows .................................................................................... 3-12
- Sketchy Lines ............................................................................ 3-12
- Depth Cueing ............................................................................. 3-14
- Background ............................................................................... 3-16
- Lighting and Photographic Exposure .......................................... 3-16

**Practice 3b Work with Graphic Display Options** ....................... 3-17

## 3.3 Adding Exploded Views ........................................................ 3-23

**Practice 3c Add Exploded Views** .............................................. 3-27

## 3.4 Setting Up Solar Studies
- Preparing for Solar Studies ....................................................... 3-31
- Using the Sun Path ..................................................................... 3-33
- Creating Solar Studies ............................................................... 3-34

**Practice 3d Setup Solar Studies** ................................................ 3-38

## Chapter Review Questions ......................................................... 3-43

## Command Summary ................................................................. 3-46
## Contents

Chapter 4: Rendering ................................................................................... 4-1

4.1 Producing Basic Renderings ................................................................. 4-2
  Prepare Views for Rendering ............................................................ 4-3
  Rendering Settings ............................................................................ 4-7

Practice 4a Produce Basic Renderings..................................................... 4-12

4.2 Working with Lighting ...................................................................... 4-15
  Light Fixture Families ...................................................................... 4-15
  Viewing Light Sources ..................................................................... 4-16
  Setting Up Light Groups .................................................................. 4-17

Practice 4b Work with Lighting ............................................................... 4-21

4.3 Enhancing Renderings ...................................................................... 4-25
  Applying Materials ........................................................................... 4-25
  Adding People and Other Components .......................................... 4-28
  Adding Decals ................................................................................. 4-30

Practice 4c Enhance Renderings .............................................................. 4-33

Chapter Review Questions ..................................................................... 4-40

Command Summary ............................................................................. 4-42

Appendix A: Additional Tools ..................................................................A-1

A.1 Creating Materials ........................................................................... A-2
  Working with Assets ......................................................................... A-8

A.2 Creating Walkthroughs ..................................................................... A-9

Practice A1 Create Walkthroughs.......................................................... A-14

A.3 Conceptual Mass Families ............................................................... A-16
  Reference Based Forms .................................................................... A-18

Practice A2 Advanced Conceptual Massing ........................................ A-20

Command Summary ............................................................................. A-27

Appendix B: Autodesk Revit Architecture Certification Exam
  Objectives.......................................................................................... B-1

Index ...................................................................................................... Index-1
